Re: Initiative to End the Incurable Era and Prevent  
30 Millions of Premature Annual Deaths in the World

Dear Mr. President, Mr. Vice President, Madam Speaker, Senator McConnell, Mr.  
Chief Justice, Judge Prost, and Distinguished Lawmakers:

My name is Dr. Jianqing Wu. I did bio-medical research for many years as a  
post-doctor researcher. I study medicine as my own hobby and explored healing  
art for many decades. My two decades of research led to discovery of fatal flaws  
in the foundation of medicine.

The total death count in the world is about 55.3 million each year. Chronic  
diseases are the leading cause of death. I estimate that 30 million are caused by  
incurable diseases.

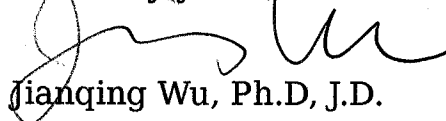

The total probabilities for getting cancer are 39.66% for man and 37.65%  
for woman. Among 535 current lawmakers, 208 will fight cancer in their  
lifetimes, and many will die from cancer. Every three minutes, one person is  
diagnosed with cancer and most of them will eventually die from it. I estimate  
that 374 of the current lawmakers will die from one or more incurable diseases.

Attached is my analysis showing how the legal system is responsible for  
creating incurable era, the cancer hoax, and the "terminal" concept.

I propose a legislative and judicial reform that will put an end to the  
incurable era and the cancer hoax, stop population health decline, and end the  
medicare funding crisis.

I can be contacted at 202-560-3000 and tempaddr2@atozpatent.com.

Sincerely yours,

Jianqing Wu, Ph.D, J.D.
